# Oska Ng

Software Engineer, Software Architect

Hello, I'm Oska, a passionate Software Engineer & Software Architect. With a deep understanding of modern languages, technology stacks, and frameworks, I am well-versed in Dart, C#, Kotlin/Java, JavaScript, and Go. My enthusiasm for technology extends to various domains, including web, mobile, desktop, backend, and DevOps. I take pride in successfully integrating more than 15+ payment methods, encompassing wallets, online banking, card payments, and more. Additionally, I actively contribute to enhancing developers' productivity and reducing unnecessary workloads through the creation of efficient toolchains and architecture designs.

In summary, I am a dynamic and dedicated professional, leveraging my diverse skill set to optimize technology solutions, resulting in seamless and productive development experiences.

## • Careers Highlight

Oska Ng is a highly accomplished Full Stack Engineer with a diverse and successful career. Demonstrating expertise in Golang, React, and microservices development, Oska played a key role in creating efficient systems, enhancing payment adapters, and leading critical projects. With a focus on security, data transformation, and integration, Oska continues to make significant contributions as Payment Software Engineer Lead, solidifying a reputation as a reliable and innovative professional.
